

No. of Functional Features Included in the Solution

Date	29 June 2026
Team ID	xxxxxxx
Project Name	Credit Card Approval Prediction System
Maximum Marks	5 Marks

Functional Features Overview:

This document describes the functional features implemented in the Credit Card Approval Prediction System. Each feature contributes to predicting credit card approval using Machine Learning and provides users with a simple web interface for entering applicant details and viewing prediction results.

S.No	Feature Name	Feature Description	Module / Component	Status (Done / In Progress / Pending)	Marks Contribution
1	Credit Card Application Form	Allows users to enter applicant details for prediction.	Frontend	Done	High
2	Data Preprocessing	Cleans and prepares applicant data before prediction.	Machine Learning	Done	High
3	Machine Learning Model	Predicts credit card approval using the trained Random Forest model.	ML Model	Done	High
4	Prediction Result	Displays Credit Card Approved or Credit Card Rejected with confidence score.	Flask Backend	Done	High
5	Responsive User Interface	Provides a simple and user-friendly web interface.	Frontend	Done	High
6	Input Validation	Validates user input before prediction.	Backend	Done	Medium
7	Model Integration	Integrates the trained Machine Learning model with the Flask application.	Flask Backend	Done	Medium
8	GitHub Deployment	Stores and manages project source code.	Version Control	Done	Medium

Feature Summary:

Metric	Count / Value
Total Features Planned	10
Total Features Implemented	10
Core / Must-Have Features	6
Additional / Nice-to-Have Features	4
Features Tested & Verified	10

Feature Category Breakdown:

S.No	Category	Features in Category	Example Features
1	User Interface (UI)	3	Home Page, Prediction Form, Result Page
2	Backend / Logic	3	Data Preprocessing, Feature Encoding, Prediction Processing
3	Database / Storage	1	CSV Datasets, Trained Model (model.pkl), Label Encoders (label_encoders.pkl)
4	API / Integration	1	Flask Integration with the Random Forest Machine Learning Model
5	Security / Authentication	1	Input Validation and Secure Data Processing
